NOTES OF INTEREST

BRITISH PHOENIX: KH6GKD, visiting Canton/Phoenix un connection with the Soviet/American joint space effort, was due to return to Hawaii July 24, but requested, and was granted permission to stay an extra two weeks. He has been quite workable on 14195 around 0400, and when found in the American phone band will give out KH6GKD/KB6 QSOs as well.

SYRIA: Karl, OE5CA/YK, has been keeping almost daily schedules with W2PPG and W4CW, who help in lining up stateside hopefuls. Usual time/freq is 2015/14245. Karl, who is leaving at the end of August, will be replaced by OE6DK/YK, Horst. Karl still needs Alaska, Hawaii, Colo, Kans, Nev, N. Mex, S. Dak, Utah, and Wyo for WAS. Any help?? (W2PPG)

MOUNT ATHOS: After some equipment problems, SV1GA/A showed up on the afternoon of July 23, with their license extended to allow operation until Sunday. As of this writing, they are still handing out QSOs on 20. From appearances, this has been the most workable Mt. Athos expedition yet and should have filled much of the need for SY on the west coast. Marty, OH2BH, the first operator heard here, was directing QSLs to OH2BH. (WA2RJZ)

FERNANDO DE NORONHA: PUØYS and PVØAKL were worked more in Europe than in North AMerica, according to reports received here. Joe is planning to try St. Peter and Paul Rocks around September 15, using PY7YS/Ø. Hopefully, conditions will allow better signals to the States at that time. (DXNS)

BURMA: Robin did make it to Burma, and apparently did have permission to operate, but was not able to take along his amateur equipment due to weight limitations on the airplane. It looks as if he may have to make a second trip...we can only hope. (WCDXB)

BV2B: The LIDXA was fortunate to have Tim Chen as guest at our July meeting. Tim, who has been on the air since 1933 as XU6A and CY3W before BV2A/BV2B, had many interesting stories of operation from BV. When he returns, the best places to find him are still Wednesday and Saturday 1100-1500 and Saturday 2300-Sunday 0300 @ 14025,14040,14218, and 14250.

Our August 22 meeting will be in Syosset and scheduled guest is 6W8FP. Any DXers interested in coming to the meeting to say hello to Chuck are invited and should contact W2IYX or me. (WA2RJZ)

DXAC: The DXAC has placed the following item on its June, 75 Agenda for consideration in October. Written comments are solicited from all DXers via HQ for DXAC distribution.
1) Is there sufficient interest in the country criteria used in considerations for the ARRL Countries List to warrant the printing of the criteria on the Countries List?

The criteria that is used was published in the October, 72 issue of QST on page 131. A copy of the criteria is available upon request to Headquarters. (ARRL)

PILEUP ETIQUETTE: FCC regulations require the use of an initial full call; e.g. FO8CI this is YI1AA. During the recent DXpedition of HKØAA, a number of stations received pink tickets because they gave only their own call signs. (W2IYX)

Can anyone help out K2GBC with the QSL QTH for KG6JDB? If so, please drop E^L a note...W9JT advises that for those interested in 75 meter Pacific DX, there is a daily ZL Net on 3808 1030-1130... Don't forget the 3V8 DXpedition by three OHs Aug 1-15...It looks like a busy fall with three major conventions all with excellent DX lineups; The National will have LU1ZC, F5QQ (ET3ZU/a), VKØWR, G3UBR, VS5MC, K4HLJ, and W3BWZ, as well as Dr. Allan Schneider (Sept 12,13,14...for info: Reg. Chairman, Box 682, McLean, Va. 22101); W9DXCC is planning VS5MC, K5QHS, W9NTP (/CEØA), WB8EUN, WA8ZDF, W9LT, W9RX, and W9CTY (Sept 20...for info: Indy DXers, 7008 West 71st Street, Indianapolis, Indiana 46278); we don;t have a firm schedule from the New England Convention yet but should have one soon...

Due to the vacation of our printer, we are using the mimeograph once more...should only keep up for one more issue and then back to offset...Last issue was #13 and sure lived up to its reputation; it seems that with all the other problems in getting it out, some may not have made it through the mail either. If you need one, drop me a note. 73 and Good DX... Bob WA2RJZ
